

Arcane Atlas

Wondrous Item, Rare (Requires Attunement by a Navigator Wizard)

This hefty, weatherbeaten volume reeks of sea salt, yet despite the apparent water damage, seems impervious to further wear and tear. On its cover is a glowing compass sigil that points North no matter which direction you turn the book. When found, it contains the following spells: *Alter Self*, *Control Water*, *Find the Path*, *Illusory Script*, *Locate Object*, and *Sending*.

The book functions as a spellbook for you. While you are holding it, you can use it as a spellcasting focus for your Wizard spells.

At the back of the book are 10 blank pages. When you use your Chart the Course feature, you can use one of these pages to ignore the GP cost of that feature. When you do so, that page is filled with the map created by that feature, and can't be used in this way again.
